DETAILED ACTION

1. The preliminary amendment filed Jan. 15, 2003 is acknowledged. Claims 1-93 were canceled. Claims 94-111 were added.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 94, 95, 103-111, drawn to methods of identifying a functional analog of Ecteinasidin-743, classified in class 435, subclass 4.
 - II. Claims 96 and 97, drawn to functional analogs of Ecteinasidin-743, unclassified.
 - III. Claims 98-102, drawn to methods of preventing drug resistance, unclassified.
3. The inventions are distinct, each from the other, for the following reasons:

Invention group I is distinct and separate from invention II, because it is neither a method of making nor a method of using the products of invention group II. Invention group I is distinct from invention group III, because methods of invention group I are drawn to methods of identifying functional analogs of Ecteinasidin-743, whereas the methods of invention group III are drawn to methods of preventing drug resistance comprising administration of a functional analog of Ecteinasidin-743. Thus, the two invention groups differ in method steps, reagents used and in methodological endpoints.

Art Unit: 1642

4. Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the products of invention I may already be known and have a separate and distinct use from the methods of invention group III. The claims of invention group II do not recite any chemical structures, but are merely described by their functionality, which may be one of many functions.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

7. Any inquiry concerning this communication or earlier communications from the Office should be directed to Anne Holleran, Ph.D. whose telephone number is (703) 308-8892. Examiner Holleran can normally be reached Monday through Friday, 9:30 am to 2:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa, Ph.D. can be reached at (703) 308-3995.
